Police Court.

SATURDAY, April 25.

(BEFORE A. F. PEMBERTON, ESQ.)

INDIAN LIQUOR TRAFFIC.

Edward Lincé—who was apprehended by the Police, on a charge of selling liquor to Indians, was discharged for want of evidence.

Wm. Williamson and George Thompson arrested by Sergeants, Blake and Hall, for the same offence, came up for trial.

Mr. Bishop appeared in defence of the prisoners.

Sergeants, Blake and Hall, proved that, on Friday, between 3 and 4 o'clock p.m., they secured themselves in the neighborhood of Cowichan, the Indian Reserve, behind the Hospital, and heard a dray approaching; about same time saw a canoe coming to shore, containing one white man and some Indians.

The drayman deposited a case on the bank and rolled it down. When they appeared, prisoner was on a rock with the Indians, saw some money pass, but couldn't swear to the money. Thompson tried to escape in the canoe, but was brought back to shore. Thompson had offered resistance, and Sergeant, Blake, knocked him down; struck prisoner twice on the head with the butt and of the pistol. Saw Indians had the gun. It contained spirit; had tasted it. Price paid may have been from \$30 to \$10.

Mr. Bishop urged that the Indian witnesses should be called, but the Magistrate intimated he should not be disposed to receive their testimony in opposition to the facts sworn.

The prisoner, Williamson—stated he had been engaged to take a barrel along the Esquimalt road, by Thompson, who said he would follow. He overcame the dray and led him through, but prisoner did not take it on the road. He saw no money paid, but received a dollar from Thompson after he deposited the case. The horse and dray he left to his employer.

Thompson—stated that he had \$15 in his possession when he was leaving town; paid a debt of \$8, and \$1 to the drayman, which made the balance correspond with what was found on his person—that he could not have received any money.

The two Sergeants were recalled, and contradicted some portions of the statements.

Mr. Bishop made a strong appeal on behalf of his clients. He urged that as far as regarded Williamson, he was an innocent and respectable man. That he had been 2d engaged to one of the Fire Companies, and that it was not 1stly for the sake of \$1 he would by himself pay to a penalty of \$500. The act only applied to the supply of liquor, and would not touch a man standing by without participating in the benefit. Prisoner had not attempted to run away. With respect to Thompson, there was more suspicion attached; but none of the Indians were heard in evidence, and the Police only said they saw what they believed to be money passing, at a distance. There was nothing to prove the spirit was sold to the Indians. He hoped the court would not sanction the usage Thompson had received.

The Magistrate, after hearing a good character of Williamson, from Mr. Cushman, held that both parties were guilty. Thompson's case was quite clear; he was liable to \$500 penalty, but, in consideration of the blow he had received, he would make the penalty lighter, and fine him \$250, or six months' imprisonment. Thompson's offence was lighter, and taking his previous good character, and other circumstances into consideration, he would impose a fine of \$50 or two months' imprisonment.

LAST WORDS FROM COWICHAN.

A French Canadian who arrived in town yesterday evening reports that the Indians had six or seven of their number in the recent encounter with the gunboat. The Clemelot's ranche was knocked to pieces by the Forward.

The Forward engaged the Indians in the Narrows on Saturday. She was anchored between two arms (about 10 miles above Maple Bay). The Indians fired on board from both points, and shot a young seaman, 18 years of age, through the head. The gunboat shelled the ranch for nearly two hours; firing about 50 shells (!). They could not tell whether they hit any Indians or not, as they did not land. Other Indians say none were killed, but probably those who don't want to admit it. The settlers here are in no apprehension of immediate danger. Some of the Indians at Cowichan were much scared and frightened to keep out of their houses don't seem to care much about it.

The Forward went on Friday to Nanaimo. Capt. Lascelles told the Indians before leaving that he would return in six days for the other rascals; and, if not forthcoming, he would finish his work. Two of the murderers of Brady have been caught, and it is pretty well known where the others are hid-ing. They all belong to Cowichan tribes.

LAST WORDS FROM COWICHAN.

A French Canadian who arrived in town yesterday evening reports that the Indians had six or seven of their number in the recent encounter with the gunboat. The Clemelot's ranche was knocked to pieces by the Forward.

Our informant further adds that the enraged Indians are vowed destruction to the "Boston" men for the nefarious liquor traffic carried on by them among their tribes.

FURTHER PARTICULARS.

We have been favored with the following narrative of the event, by some gentleman just arrived from Nanaimo:

The Forward anchored in a small harbor, with the wretched and degraded appearance of a class of people, called by the slave-holders "poor white folks," and the "tallow faced gentry" from their pale complexion. They live in wretched huts, dirty, mean, and an exceedingly filthy in their habits. Many of them are old or decrepit, and the inmates of their cruel task masters, who beat them into a state of semi-starvation. The negroes are becoming popular very fast, and it is thought the negroes will be the chief object, and think they will be to do all the fighting themselves. But on the whole the negroes are becoming popular very fast, and it is thought the negroes will be the chief object, and think they will be to do all the fighting themselves. All this time the greatest confusion ensued, the rev. gentleman hit by five or six policemen. He cried out—"That—Decimus Gadsby did for me—I am ruined—they are devils—the magistrates and their clerks are against me—oh dear, oh dear—I have not had a fair trial—they have sworn falsely!" This continued for a few minutes, when the wretched man lay senseless on the floor. On rallying he was removed from the room, and at the top of the stairs he attempted to throw himself to the bottom, and was prevented. Later in evening he was served with a bill of costs for his trial, and again he became very excited, his reason having entirely forsaken him. He remained the whole of Saturday evening at the Mitre Inn, Repton, Inspector Rossell, of the county constabulary, watching him. The scene caused a painful sensation in court.

Akin to this is the practice of snuff-dipping, which is practised exclusively to females of the poor white caste, though scarcely one in fifty of this class is exempt from the disgusting habit. The method is this: The female snuff-dipper takes a short stick, and wetting it with her saliva, dips it into her snuff-box, and then rubs the stick dust all about her mouth, and into the interstices of her teeth, where she allows it to remain until its strength has been fully absorbed. Others hold a stick thus damped with snuff in the cheek, a la quid of tobacco, and suck it with a decided relish, while engaged in their ordinary vocations; while others simply fill the mouth with the snuff, and imitate, to all intent and purpose, the chewing propensity of the teeth, and the mouth filled with dirt. The mud with which they daub the interstices between the logs of their rude domiciles must be frequently renewed, as the occupants pick it all out in a very short time, and eat it. This propensity induces disease. The complexion becomes pale, similar to that occasioned by chronicague and fever.
